

A new Almanacke and Prognostication, for the

yeare of our Lorde, 1569. Wherin is
expressed the chaunge, full, and quar-
ters of the Moone, the varietie of
the ayre, and diuers other
profitable thinges,

Calculated for the meridian of London
and will serue for all England, by
WILLIAM IOHNSON.

PSALME. 103.

¶ The Lord hath prepared his seat in heauen,
And his kingdome is ouer all.

¶ Psalme. 24. The earth is all the Lordes,

The compasse of the world,

Is governed by him.

With all that is therein:

2.
C. 194 a. 870

To the gentle Reader. *Grace, mercy,*
and peace, for euer, Amen.

 M O N G many excellent knowledges which is to be had by trauel, my thinketh (gentle reader) this knowledge of Astronomy is worthy of it. For by it the great omnipotency of the most mighty *IEHOVAH* is not only by creation known: but also his great prouidence is most maruelously sene and vnderstode among all his creatures by preservation. His iudgement also felt in destruction. Who but God created the whole world: for by his worde were all thinges made, he alone is the preseruer, who preserued the childré of Israell in the wildernes: who made a way for them in the red sea, euen he that destroyed Pharao and all his host therein. What creature is there on the earth that is more beholding to the goodnes of God then mā: to whō he hath participated much of his goodnes, to whō he hath geuē such knowledges as passeth: nothing is to be cōpared vnto it. For to mā he hath geuen knowledge through his word, what he himself is, what also he hath in store for thē that feare him. Also what he hath prouided for thē that set light by him and his word: for the one life euerlasting, for the other eternal death and destruction. He hath also geuē knowledge vnto mā, that whē the earth (I meane the people of the earth) do geue them selues to sin and wickednes, that he is angry and will punish, that they cast vp their eies vnto the heauēs, & there they shal see his frowning counteuāce, redy bent to poure forth his wrath and displeasure vppon thē, by wars, famine, and pestilēce, which is shewed and threatned, by the signes and planets. Therefore this science of Astronomy, is rather to be vsed, then refused, rather godly practised, then fondly, and foolishly

lilyly despised. But O vnthākful mā which is & hath bene euermore vnthankful, no blessing that god hath geuē thee, wil moue thee to shew thy self thankful, I feare that this vnthankfulnes of thine will depriue thee of a heape of singuler blessings. Who hath bene thākful vnto God for his worde so faithfully & truly preached among vs, who hath bene thankful for the lōg peace & quietnes of this realme, & the defēce of the same frō foraine powers, who hath bene thankful for the great plenty which God geueth and daily bestoweth vpon vs, who feareth the wrath of God, to be powred forth vpon vs, for our couetousnes, for our pride, for our vsury, for our adultery, for our blasphemie, & such greuous sinnes wherewith we offend the maiesty of our God, who harkeneth vnto hys voice, when he saith *Reuertimini & sicut ad me*, returne as far as vnto me, surely none. Then if none will returne, the Lord hath promised that he will make the heauens as brasse vnto thee, the earth as yron vnto thee, and hell to deuour thee. Therefore returne vnto the Lord, and he wil returne vnto you: for as Dauid saith the Lord is mercifull and full of compassion, & as the prophet Ezechiel witnesseth would not the death of a sinner but rather that he turne and be cōuerted, let vs know as S. Paule saith, that the long sufferance of god calleth vs to repentance: therefore let vs run with the prodigall child, and say father, I haue sinned against heauen and against thee, I am no more worthy to be called thy sonne: let vs with the Publicane strike on our brestes and say, God be mercifull vnto vs sinners: if we then with true penitent hartes turne vnto him, he will then receaue vs, and not onelye remoue those things from vs which he threatneth vs with all: but also wil geue vs his blessing still here in this world, but also in the worlde to come, life euerlasting.

John 14:15

*A declaration of all such thinges as is
contayned in this present Almanacke,
for the yeare of our Lord. 1569.*

The Golden number.	xii
The Dominicall letter.	B
Septuagesima the vi. day of Betwene Christmas & Epiphanye.	February 8. wekes (9. dayes)
Ashwednesday the xxiiij. day of Easter day the x. day of Rogation Sunday the xv. day of Ascension day the xix. day of Whitsonday the xxix. day of Betwene Whitsonide and Midsummer, iiij. wekes and v. dayes.	February April May May May
Trinitie Sunday the v. day of Aduent Sunday the xxviiij. day of	June November
The rising and setting of the Sunne at the en- trance of the signe first day of euery month.	
The entring of the Sunne into any of the xij. Signes in the Zodiacke.	
The Sundayes throughe the yeare nominated in the Kalender.	
The beginning and ending of euery terme.	
The Amber dayes.	
The tymes for bloudletting noted with this marke	b
The times for purging with this marke	p
The times for grafting and planting with this marke	g
The times for sowing with this marke	f

Of

Of certaine elections which is to be obserued in letting of blood.

Whosoever will be let blood, let these things be obserued: First to consider the cause wherefoze he should bleede: Then to see his age whether it will beare it or no: Then tender his complexion what that is: Then the qualitie of the diseaie, and of what humor it procedeth: Then the quantitie that is to be taken: The tyme of the yeare wherein it is to be done. For know ye that according to Galene and diuers other learned, that the spring time is best.

The signes conuenient is Aries and Sagitari for the flegmaticke.

The first part of Libra as some say, and Aquarius for the Melancholike.

The last part of Scorpio, Cancer, and Pisces for the cholerike.

For the Sanguine, all, or the most part may be vsed.

Also it is to be knowne that the whole course of the moone is to be deuided in iiii. seuerall quarters whiche thing muste bee obserued in blood letting.

As from the chaunge to the first quarter is a tyme conuenient for yong folkes.

From the first quarter to the full, for middle age.

From the full to the last quarter for the aged.

From the last quarter to y^e change, for y^e old age.

Furthermoze it is to be noted that there bee diligent heed taken, that no wayne bee opened where the Moone hath her regiment, and that it be done in an apt and mete signe.

Also that you geue your patient warning, that
the

he kepe himselfe from slepe, and that at the least
vi. houres after, that he in walking walke not
to fast, that he runne not, neither vse any bene-
rous acte, that he vse moderate dyet, both in
meat and drinke, and to auoyde much abstinence
ouermuch slepe, late sitting vp and such lyke,
which bringerth great inconuenience vnto the
body.

*¶ Of the elections to be obserued in the
maner of purging.*

I meane not (gentle Reader) much to trou-
ble you with any further instruction, the I dyd
in my last Almanacke, that is that these things
be noted which here follow (that is to say) that
the person be considered, his age, his complexi-
on, the disease that he is in, the tyme of the yere,
the region or countrey which he dwellerth in, the
custome which he vseth himselfe vnto, and last
of all what strength he is of. And sozasmuch as
the Moone doth hurt the operation of the me-
dicine, if it be not genen in time conuenient, yet
is therfore profitable to note diligently the elec-
tions mete for the same according to her course
and inuementes.

The moone in Aries, Leo, and Sagitari, the ver-
tue attractiue is comforted by hote and dry.

The Moone in Taurus, Virgo, and Capricorne,
the vertue retentive is comforted by cold & dry

The Moone in Gemini, Libra, and Aquarius, the
vertue digestiue is comforted by hote & moiste.

The Moone in Cancer, Scorpio, and Pifces, the
vertue expulsiue, is comforted by cold & moyst.

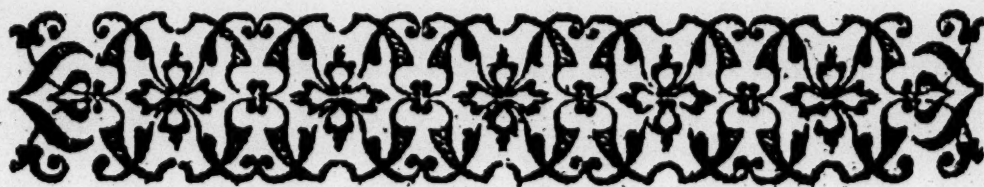

When she is in Cancer, purge by electuary no-
ted with these markes

In Scorpio, by drinckes noted with these
markes

In Pisces, by pills noted wth these marks

Like wise for choler, fleume or melancholy, it
is mete to note these aspectes of the Moone.

The moone hauing trine or sextile aspect with
Venus in the signe of Cancer it is then good to
purge choler by electuary which is noted in the
Kalender with these markes Δ or \ast ♀. She ha-
uynge trine or sextile aspect with γ sunne in the
signe of scorpio, it is then good to purge fleume
by drinckes which is noted in the kalender with
these markes Δ or \ast ☉. If she haue trine or sex-
tile aspect with Jupiter in the signe of Pisces it
is then good to purge Melancholy by pills
which is noted in the Kalender wth these markes
 Δ \ast ♄. And if ij. planets shalbe in one like tyme
beheld thus of the Moone, then ij. purgations
shal be good, as if the moone should haue trine
or sextile aspect with the Sunne and Venus to-
gether then may you purge choler and fleume
together: for the sunne purgeth fleume, and Ve-
nus choler, Iupiter melancholy. Furthermore
you must beware of taking medicine what so e-
uer it be, the moone beyng in quadrate or oppo-
sition with Mars Saturne or Iupiter,

An instruction for the Chirurgion.

THe Chirurgian must take heede,
 as learning doth him will :
 That he obserue which doth proceede,
 for doynge any ill.
 That he touch not with instrument,
 the body of that man :
 Wherin the Moone hath gouernment,
 and raighth as Lady than.
 Nor when the Lord ascendent is,
 in gouernment that part :
 You shall not touch least that ye rais,
 the true knowledge of art.

Aries
 Taurus
 Gemini
 Cancer
 Leo
 Virgo
 Libra
 Scorpio
 Sagitari
 Capricornus
 Aquarius
 Pisces

The

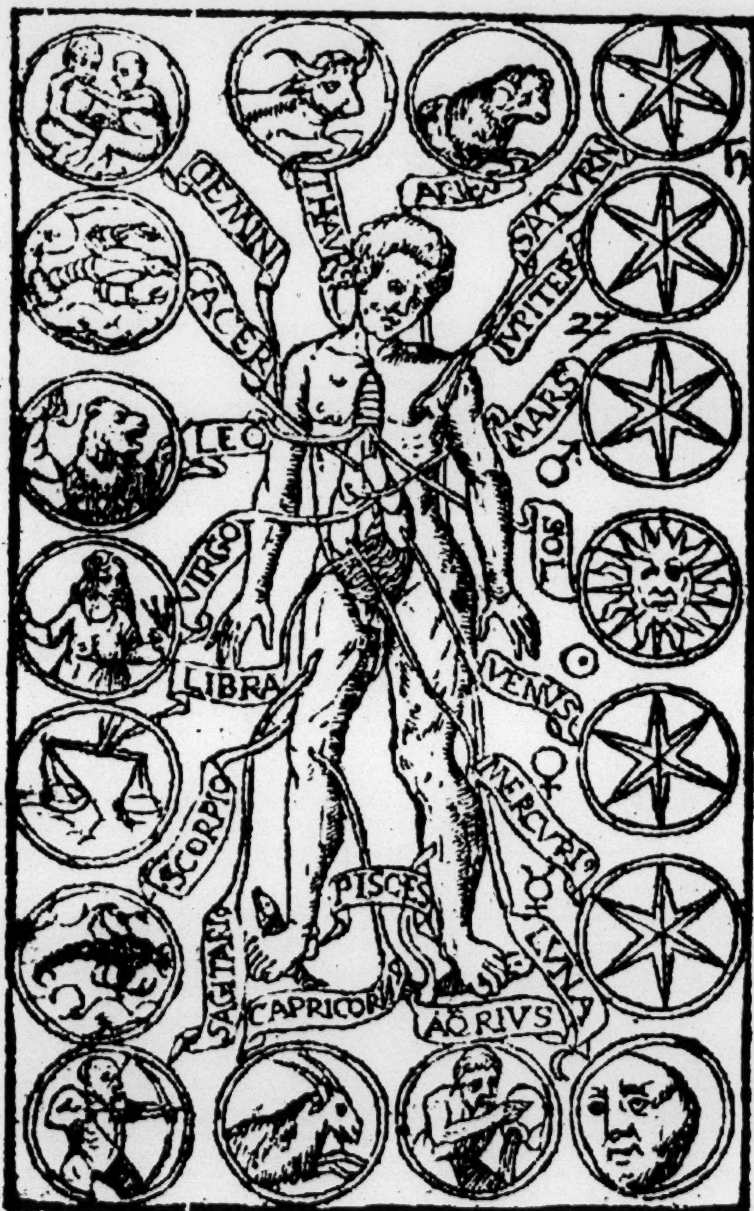

the head,
 the necke and throte,
 shoulders, armes & hands
 the brest and lungen,
 the back, ribbes and hart,
 stomack, guttes, and belly
 the reines and hippes,
 the bladder & secret parts
 the thighes,
 the knees,
 the legges,
 the feete,

As the figure on the other side declareth.

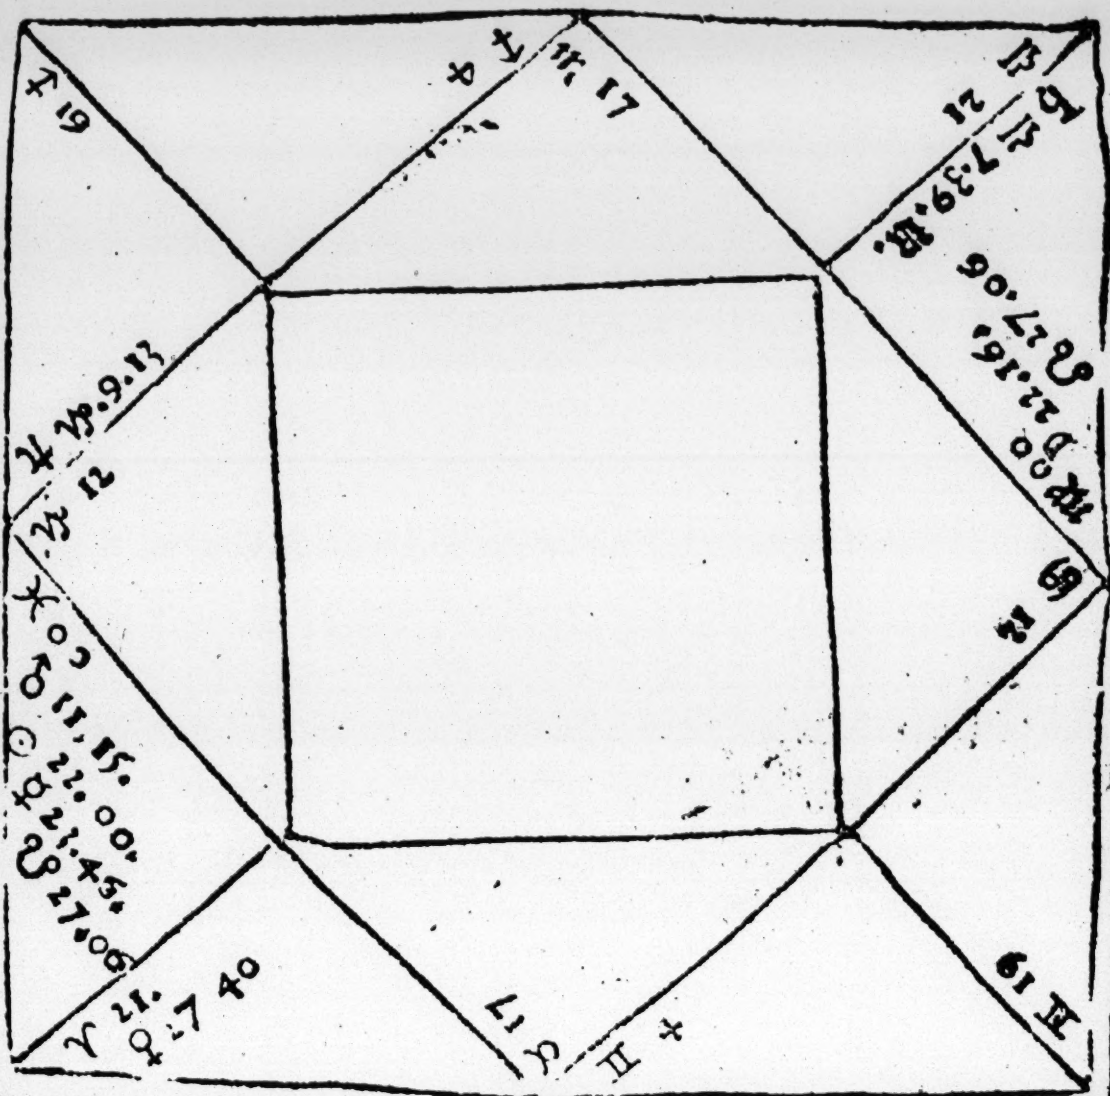

According to this saying of Ptolome
 in his Aphorisme.

*Noli membrum tangere ferro, quando Luna est
 in signo, quod illi membro dominatur.*

 *In this figure you may plainly*
 see how eche part of mans body is
 gouerned by the aforesaid
 signes.

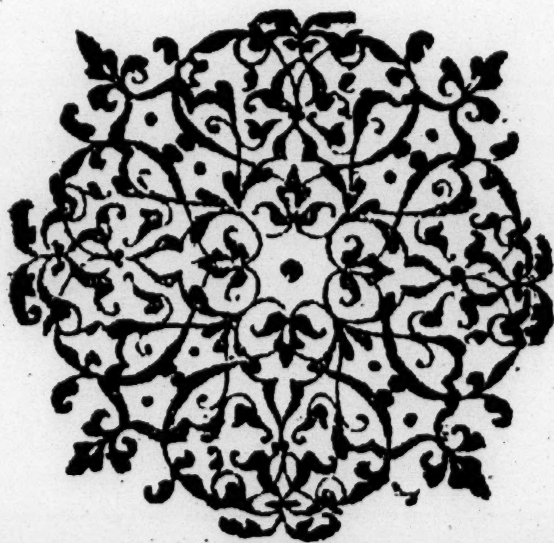

The Eclipse of the Moone.

This Eclipse shall be the iij. day of March at ij. of the clocke 45. minutes in the morning, she then hauing her course in the 22. degree and odd minutes of Virgo, she shall be darkned 13. pointes, 32 minutes, she shall sustaine her detriment in the 8. house, which is the house of Mercury, within 5. degrees, 11. minntes of the dragons head, at 3. of y clock, she shalbe in her perfect darkenes, she shall remaine vnto 4. of the clocke, the tyme of her darkenes from the

the beginning vnto the ende is i. houre and 16. minutes, the lord of this eclipse is Iupiter, he beyng in Capricorne, which is the house of Saturne, and in the 12. house which is his iay, Saturne himselfe beyng in the 8. house in Libra whiche is the house of Venus, Venus her self being in Aries, which is the house of Mars, Mars himself being in Pisces which is the house of Iupiter. As touching the significatiō of this Eclipse, I leaue it to be considered of the learned. The effectes that this eclipse shal worke shal be frō the 2. day of Iuly vnto the 18. day of August this ycare 1569. He shall cause the time to be temperate and seosonable, hauing some moist ayre, so that some greuous sickenes will be. God for his sonne Chzist his sake, pardon our sinnes, confirme and strengthen vs in all goodnes, and bzing vs to lyfe euerlastyng,
Amen.

✠ A Prognosti-

cation for the yeare of our Lord, 1569.
Seruyng for all England, wherin is expressed
the chaunges of the moon: with the full and
quarters: The varitie of the ayre, and
also the windes throughout y^e whole
yeare with the signification of the
eclipse of the moone which is
this present yeare.

*Collected and gathered by
William Iohnson.*

¶ *Psalme. 108.*

¶ I will geue thanks vnto thee (O Lord) among the
people: I will sing prayes vnto thee among the
nations, for thy mercy is greater then the hea-
uens, and thy truth reacheth vnto the cloudes.

Of the foure quarters of the yeare, and first of the winter as followeth.

Enter which is a season by nature cold and moyst, beginneth when y sunne entreteth into the first min. of Capricorne, which is the 12. day of December 1568 at 11. of the clock 45. minutes, x. secondes and 39. in the morning, Saturne being in the 9. degree and 18. minutes of Libra, being the house of Venus, and in his owne exaltation, being also in the 12. house which is the house of imprisonment and his ioy, the moone being there also in the 4. degree 48. minutes of Libra, the Dragons head being there also in the 1. degree 26. minutes of Libra. The lord of the house is Mercury. The 18. degree 20. minutes of Libra is the ascendent, of the which Venus is lady, the house succeeding is the 11. degree 10. minutes of scorpio which is the house of Mars the house cadent is sagitari, which is the house of Jupiter, whercin he himselfe is placed, being in degrees 23. and 20. minutes. The sunne is also in Capricorne in this cadent house having Mars under his beames, Venus & Mercury being there also in the 17. degrees and 18. of Capricorne, the lord of which house is Saturne, the 4. house being the angle of the earth is 23. degree 10. minutes of Capricorne, Saturne lord, the house succeeding is Pisces, of the which Jupiter is Lord, the house cadent being the house of sickness is Pisces, of the which Jupiter is Lord. The angle Occidentall is the 18. degree

The Prognostication.

degre 20. minutes of Aries, of the which Mars is Lord, the house succeeding being the house of death, is the 11. degree 5. minutes of tentus, of the which Venus is Lady, the 9. house is the 12 of Gemini, of the which Mercury is Lord, the angle meridionall is the 23. degrees 5. minutes of Cancer, of the which the moone is Lady, the 11. house is Virgo, of the which Mercury is Lord. By the which figure I finde that Venus shall be lady, which shall cause this season of the yeare to shew forth his kynd by cold and moist she wyll also worke to allwage the yre of cruell Mars, whose ire being pacified, shall soone abate y^e ioy of Saturne, who seeketh what he can to do mischief. The sicknesses of thys tyme wil be both diuers & perilous, which wyl not only be diseases which shall rise of fluxie, but also of corrupted bloud, wherby are engendred Catarrhes of reumes, the bunla, the cough, dyspnoches and griefes in the sides, inflammation of the lunges, paynes in the brest, head ache, plurisie, Cardiacum, anginam, scabiem gallicam, Lienteriam and such like women shall be troubled wyth passionis matricis wherin I gather that it wil be hurtfull to women with childe, but let them call vpon the Lord and he will helpe them. who saith call vpon me in the day of trouble, and I will beare thee and deliuer thee. Other things which is to be spoken, I leaue to the good consideration of the learned, lettynge passe the signification of these Planettes in the sygne of Capricorne, that is the Sonne, Mars, Venus, and Mercury. Praying vnto the eternall God, that he wyl not enclie be the gouernour of

The Prognostication.

of the heauens, whereby his glorious power may appeare: but also to season our hartes with hys holy spirite, that we may liue to set forth his honour and glory, seeke the preservation of our prince and countrey: and the saluation of our soules in Christ Iesu. Amen.

*This season is by natures kinde,
geuen to moyst and colde:
And if the same we do so finde,
What then may forth be tolde,
Forsoth, that euery thing doth shew,
his duety in his tyme.
But man, that doth the same best know,
is worst of any kine.
Therefore (O man) retorne with speede,
amend thy sinnefull lyfe:
For God doth threaten now in deede,
to punish man and wyfe.*

¶ Of the spring tyme.

The spring tyme which is a season hote and moyst, doth begin when the sonne entreteth into the first minate of Aries, which shall be the 11. day of March at 5. of the clocke, 12. minutes, 15. secondes in the morning, the ascendent being Pisces wherin Mars is placed, 17. degrees, 36. minutes: The Sunne bepng in the same angle, vnder whose beams Mercury is, and they both in the house of Mars, Mars himselte bepng in the house of Jupiter, and in the angle of the Ascendent,

The Prognostication.

cendent, the succeder is Venus, who is placed in the 7. degree 34. minutes of Taurus which is his owne house, he beyng also Septentrional ascendant, the house cadent is Gemini, and so is the angle of the earth, of the which Mercury is Lord, but he is enclosed with the sunne beames in the house of Mars, the house succeding is Cancer, of the which the moone is Lady. The angle Occidentall is Virgo, in the which angle is Saturne in the 6. degree 56. minutes of Libra Retrograde, the viii. house whiche is the house of death is Scorpio, of the which Mars is Lord, the angle meridional is Sagitari, of the which Jupiter is Lord, Jupiter himself beyng in the ii. house, in the 10. degree 15. minutes of Capricorne, whiche is the house of Saturne, the Moone being there also in the 17. degree and 6. minutes, the 12. house is the 19. degree, 15. min. of Capricorne, in the which house he much reioiceth, but he himselfe is in the house of Venus. I fynde that of this season of the yeare, that Mars Jupiter and Venus, shall be the rulers, of the which Mars shall be the chiefe Lord, and Jupiter the next, and Venus the third: wherfore I gather that this season shal be more whotter and dryer, the tyme would require, for that Jupiter and Mars is both Oriental. The sicknesses of this present tyme wil be greuous, and many as pallsies, blacke Jaundies, quartain fevers, Iliaca passio, Apoplexiam, spasmodum, Anginam epileptia. After these follow erisipilas, dissenteriam, tercian, & quotidian fevers, Syncope, Cordiaca, and runnyng eyes. which diseases will be straunge in this season of the yere, as for any other thing to write touchyng the disposition of the tyme I
nede

The Prognostication.

wede not much. For as S. Peter saith the Devil goeth about like a roaring Lion seeking whom he may deuour, whom we must resist by strong sayth. Therefore here I do exhorste all sortes of people to remeber their promise made in their baptisme, that is to forsake the Devil and al his workes, the vayne pompes of the worlde, and all the sinnesfull lustes of the flesh, then I doubt not but those thinges which God by the heauens doth threaten to come on the earth, shall be withdrawen, if we repent and amend.

*In equall state is sunne now set,
his goodnes to extend:*

*His duety he will not forget,
but do it to the end.*

*Therefore O man thy duety do,
to God which did thee create:*

*And he will turne from thee that woe,
which he to thee doth threat.*

¶ Of the Sommer.

Sommer which is a season by nature whotte and dry shall begin when the sunne entreceth into the first minute of Cancer which shall be the 12. day of June at 11. of the clocke, 38. min. 7. seconds and 30. thirde in the afternoone, the ascendant being Libra 27. degrees 15. min. of the which Venus is Lady, Venus her selfe being

The Prognostication.

being in the angle meridionall, in the 9. degree 46. minutes of Leo, which is the house of the sunne, the house succeeding is Scorpio, which is the house of Mars, Mars hymselfe being in the 8. house in the 27. degree 58. minutes of Cancer, of the which Venus is Lady, the 3. house is Sagitari, whereof Jupiter is Lord, Jupiter hymselfe being in the sayd 3. house, in the 8. degree of Capricorne, of the which Saturne is Lord, Saturne hymselfe being in the 11. house in the 2. degree 57. minutes of Libra. The 6. degree 20. minutes of Aquarius is the angle septentrionall, the house succeeding is the 11. degree 20. minutes of Pisces, of the which Jupiter is Lord, the sixt house which is the house of sickness is the syxt degree eightene minutes of Aries, the Angle occidentall is the 27. degree 15. minutes of Aries, of the which Mars is lord, the 8. house which is the house of death, is Cancer, Mars being there in 25. degree 58. minutes, the Moone being in the sayd 8. house in the eyght degree syxe minutes of Gemini, whiche is the house of Mercury, Mercury hymselfe being in the 9. house, in the 25. degree 42. minutes of Gemini, which is hys own house in the whiche house the Sunne is entering in the first minute of Cancer. The chiefe gouernours of this quarter is Saturne, Mars and Venus, but the chiefest of all to be ruler for this quarter is Venus, Saturne and Mars, being the nexte, the whiche shall make this season more temperate then men would presuppose it to bee. The sykenesses or diseases of this quarter wyl be these that followe.

the

The Prognostication.

the pestilence, part of those diseases which were in the last quarter, with these added therunto, carbuncles, fistulasse, tercian, and quotidian fevers, it wyll be a perilous season for women wyth chylde, beside that other women shall bee endaungered, some wyth diseases, & some wyth imprisonmentes, what other thynges is to be spoken, I refer to the learned to consider which by the description of the heauens before declared is to be gathered: But what shall I stande on those matters, I see that the iniquitie of our time to be such, y^e the wrath of God wil be more greater, then we shall be able to beare. God for his sonne Christ his sake forgive vs our sinnes geue vs true repentaunce, p^reserue the queenes Maiesty, defende this Realme, geue vs peace in Christ Iesus. God graunt it Amen.

*¶ The Sunne into the Tropick hye,
is set to geue his hear:*

*To teach to man most certainly,
that God doth not forget.*

*But so provide for man in tyme,
by his great prouidence:*

*That he shall haue both corne and wine,
to serue for sustenance.*

*Therefore (O man) geue thanks to God,
cease not to geue him prayse :*

*And he wyll then withdraw his rod,
and geue thee cherefull dayes.*

*Thy Prince he wyll both blesse and keepe,
thy land he wyll defend:*

And

The Prognostication.

*And make thee hys accepted sheepe,
to raigne with hym in thend.*

¶ Of Autumne.

Autumne or Harvest beginneth when the Sunne entrech into the first minute of Libra, which is the 14. day of September, at 3. of the clocke, 53. min. 55. secondes, 52. chirdes, and 30. forthes in the morning, this season is by nature cold and dry. The ascendant beyng the 6. degree 18. min. of Virgo, which is the house of Mercury and his ioy, himselfe beyng placed therein, hauing the dragons head almost in conjunction with hym, he hymselfe is one of the Lordes of this quarter, the house succedynge is Virgo, in y^e which house the sunne is entring into the first minute of Libra, Saturne beyng there with him, escaped from his bealmes they both beyng in the house of Venus, Venus herselfe beyng in the 12. house in the 15. degree 21. min. of Leo, which is the house of the Sunne, the house cadent is 23. degree 10. minutes of Libra, the moone beyng in the 15. degree 4. minutes of Scorpio, which is the house of Mars, Mars himselfe beyng in the 11. house in the 29. degree 15. min. of Cancer, which is the house of the moone, the angle septentrionall is the 29. degree 15. min. of Scorpio, in the which angle Jupiter is, in the 4. degree 9. minutes of Capricorne, whiche is the house of Saturne, Saturne hymselfe as aforesayd in Libra, beyng the house of Venus, the house of sicknes

C. j. be-

The Prognostication.

belongeth vnto Saturne, the angle occidental is the 6. degree 18. min. of Pisces, of the which Iupiter is lord, the angle meridionall is the 29. degree 15. minutes of taurus, Venus being therof Lady and gouernour. The chief gouernours of this quarter is Mars and Mercury, wherof Mars is chiefe. I fynde that this season of the yeare shall be both whote and dry, & therfore there shall be all the diseases which was in the quarter before and at the spring, and the state of the world, to be as before: but I feare accordyng to the olde prouerbe, the longer the worse, there is no doubt of the plenty of this present tyme, though there be many yll wyllers, the Lord God for his mercy sake roote out, confound, and destroy all those that beare no good will to the common weale, as I trust he will in his due tyme. The lord geue vs grace to be thankfull vnto him, obedient to our pryncce, and faithfull and louing one toward another, then I trust God shall be glorified by our doyng, and we shall receyue the blessings which he geueth here in this lyfe: And also shall be pertaker of his blessing in the eternall kyngdome. which the Lord God graunt vnto vs for Christ Iesus sake. Amen

*The Lord his blessing forth doth geue,
to those that stand in neede:*

*For by hym sure, all thinges doth lyue,
he doth them daily feede.*

*Therefore let vs with hart and voyce,
to hym geue laude and prayse:*

The Prognostication.

O let vs come and now reioyce,
and geue hym thanks alwayes.
That of his goodnes doth vs feede,
and mercy doth vs keepe:
He doth vs helpe in tyme of neede,
he sayth we are his sheepe.
Therefore let vs geue thanks to God,
and prayse hym euermore
That he from vs withdraw his rod,
so end this quarters foure.

¶ The disposition and alteration of the weather, with the chaunge, full, and quarters of the Moone, and first of January.

The first sayre and temperate, the 1. wynde
and snow. The full moone the 3. day, the
